BMX TRACK IN USE AT THE OUTBACK TOWN OF YALGOO, WESTERN AUSTRALIA

No Dust, No Rust... All Action.

Now your community can have all the thrills and action of a BMX track without all the dust and on-going maintenance.

The Rage Cage BMX track is a custom designed, built on site concrete bike-way, combined with pre-fabricated metal ramps, jumps and railing. The concrete course is finished with a hard-wearing bright coloured surface. The ramps are designed and manufactured in Australia from solid steel, galvanised and brightly powdercoated. They are bolted into position and are virtually indestructible.

Rage Cage gives you the flexibility to layout the course to suit your individual location and is suitable for BMX Bikes, Skateboards, Scooters and Inline Skates.
